SUMMARY

AI Engineer with 1 year of professional experience building and deploying enterprise-grade AI applications, agentic workflows, and RAG-based systems using Python, LangChain, LangGraph, FastAPI, and Azure AI. Experienced in multi-agent orchestration, LLM integration, API development, tool calling, automated evaluation, observability, CI/CD, and production deployment, delivering scalable AI automation solutions for enterprise environments.

SKILLS

Programming & Data: Python, Pandas, NumPy, PostgreSQL, Data Processing
AI & Agentic Systems: LLMs, Generative AI, NLP, RAG, LangChain, LangGraph, Multi-Agent Systems, Prompt Engineering, Tool/Function Calling, Human-in-the-Loop (HITL), LLM Evaluation, Fine-Tuning
Vector Databases & AI/ML: ChromaDB, FAISS, Hugging Face Transformers, Scikit-learn, PyTorch, TensorFlow, Keras, NLTK, spaCy
Backend & API Development: FastAPI, REST APIs, Pydantic, OpenAPI/Swagger, API Integration, Streamlit
Cloud DevOps: Microsoft Azure, Azure OpenAI, Azure AI Foundry, Azure DevOps, Docker, Kubernetes, AKS, Helm, GitLab, CI/CD
Security, Monitoring & Testing: OpenTelemetry, Grafana, Logging, Authorization, Authentication, JWT, mTLS, Azure Key Vault, Access Control, DeepEval, Pytest, Unit Testing, Integration Testing, Test-Case Design, Debugging
Frontend & Others: React, TypeScript, HTML, CSS, Git, GitHub, Documentation, Release Management

EXPERIENCE

UBS-Technology Services, AI Crew(Via Hays) **Oct. 2025 – Oct. 2026**
AI Engineer *Hyderabad, India*

- Designed and engineered 3 enterprise-grade AI applications using Python, FastAPI, LangChain, and LangGraph, implementing agentic architectures and LLM orchestration to automate enterprise workflows.
- Developed production-oriented agentic workflows integrating GPT-5.1 and GPT-4.1 models, multi-agent orchestration, RAG pipelines, and tool/function calling to automate complex enterprise business processes.
- Managed 20+ successful production releases with zero deployment errors, overseeing deployment, validation, monitoring, automated evaluation, observability, human-in-the-loop approvals, and CI/CD.

Innobyte Services **Dec. 2024 – Jan. 2025**
Data Analysis Internship *Remote*

- Analyzed Amazon sales data across 3 dimensions: sales trends, customer preferences, and geographical performance.
- Delivered data-driven recommendations across 3 areas: sales optimization, inventory management, and customer satisfaction, supported by analytical reports.

PROJECTS

Request Management Service – Agentic AI Enterprise Automation | Python, LangChain, LangGraph, TypeScript, RAG

- Orchestrated a Python/FastAPI-based enterprise Request Management Service, automating end-to-end triage, enrichment, investigation, and resolution of 200+ daily requests across Atlas and ServiceNow using 4 agentic workflows and RAG integrations.
- Built a reusable Agent Skills Framework and Sandbox, generating and evaluating 200+ executable AI skills across 100 use cases from knowledge articles and PDFs, eliminating application code changes for workflow expansion.
- Configured MS Teams-based human approvals and auditable execution, achieving 2-minute resolution, with DeepEval evaluation, OpenTelemetry monitoring, and Docker/Helm deployment on AKS, supporting 70+ teams.

AI Personal Finance Planner | Python, LangGraph, LangChain, GPT-4.1, RAG, React, TypeScript

- Architected a multi-agent financial planning platform with 3 specialized agents for financial data collection, investment planning, and goal-based recommendations, leveraging 5 financial input categories.
- Delivered personalized recommendations across 4 investment areas (lump-sum, stocks, fixed deposits, and financial goals) through a responsive dashboard showcasing investment options, savings strategies, projected returns, and risk-adjusted goal plans.

AI-Powered CI/CD Root Cause Analysis | LangGraph, Azure OpenAI, Python, FastAPI, GitLab REST API, React, TypeScript

- Designed a 4-agent LangGraph workflow for GitLab CI/CD failure analysis, root-cause tracing, remediation, and incident correlation, integrating 4 GPT-4o capabilities for error extraction, 6-category classification, confidence scoring, and fix recommendations.
- Engineered an asynchronous FastAPI backend integrated with GitLab REST API v4 and a React 19 dashboard delivering 5 capabilities: execution timelines, RCA summaries, manual log analysis, failure analytics, and incident tracking.

CERTIFICATIONS & ACHIEVEMENTS

- Microsoft Certified: **Azure AI Fundamentals** – Issued by Microsoft
- Microsoft Certified: **Azure Fundamentals** – Issued by Microsoft
- UBS Certificate of Achievement: **NextGen AI – Agents in Action** – Issued by UBS
- Generative AI for Everyone – Authorized by DeepLearning.AI
- Introduction and Boost Your Productivity with GitHub Copilot – Authorized by Microsoft

EDUCATION

Teegala Krishna Reddy Engineering College **Dec. 2020 – Jun. 2024**
Bachelor of Technology(B.Tech) in Computer Science *CGPA: 7.38/10*
